

Connectivity Options

Output connector options include Laser Point's IIS (Intelligent Identification System) on DB15 connector, BNC, Molex and 2 or 4 wire pigtail.

-The **DB-15** houses an EEPROM which stores calibration corrections and other head relevant data. We provide for use with LaserPoint's LPM-OEM, LPM-CE and PLUS power and energy readouts.

- **BNC connectors** give, total plug/un-plug ease and high EMI noise shielding.

-**Molex connectors** make easier the removal of detectors for service or for their use at other locations

- **Pigtail:** 2 or 4 wires, depending on models, deliver the natural signal of sensor discs or heads to a control unit or host system .

Connection Type	Output Signal from Sensors and Heads	Available on	Product Code
2x 150 mm leads	Natural response	SD, CS series	WN
4x 150 mm leads	Amplification and acceleration	AH series	WA
BNC	Natural response	CS series	BN
Molex 6410	Amplification and acceleration	AH series	MO
DB15 (cable up to 5m)	Natural response	CS, Fit series	DN
