

Laser Point is proud to announce that a new calibration centre is now available for our customers in China.

This calibration centre is located in Hangzhou and is managed together with our partner **Hangzhou KEWLAB**.

With our local calibration centre, all Chinese customers will benefit from short recalibration lead time and reduced cost by avoiding shipping back their products to Italy to perform the periodic recalibrations.

Laser Point and Hangzhou KEWLAB are always focused on providing a local and efficient after-sales service to all their customers in China.

CALIBRATION CENTER:
